BMC Plant Biology

- Covers Plant Biology including molecular biology, physiology, biotic and abiotic interaction, and plant biotechnology
- International readership and editorial board
- Well respected in the field

*BMC Plant Biology* is an open access journal publishing original peer-reviewed research articles in all aspects of plant biology, including molecular, cellular, tissue, organ and whole organism research.

*BMC Plant Biology* is part of the BMC series which publishes subject-specific journals focused on the needs of individual research communities across all areas of biology and medicine. We do not make editorial decisions on the basis of the interest of a study or its likely impact. Studies must be scientifically valid; for research articles this includes a scientifically sound research question, the use of suitable methods and analysis, and following community-agreed standards relevant to the research field.

BMC series - open, inclusive and trusted.

Impact Factor: 3.964 (2016), Journal Citation Reports®

Giving authors in their area of expertise the opportunity to publish open access
- High visibility thanks to unrestricted online access
- Rigorous peer-review and high-quality author services
- Creative Commons licensed – authors retain copyright
- Citation tracking and inclusion in bibliographic databases
- Easy compliance with open access mandates
