BMC Family Practice

- Broad and inclusive scope: includes clinical, epidemiological and public health research
- Respected journal in field, ranked 3rd open access journal in Primary Health Care category of Journal Citation Report
- Efficient, fair and friendly open peer-review service

*BMC Family Practice* is an open access, peer-reviewed journal that considers articles on all aspects of primary health care, including clinical management of patients, professional training, shared decision making, and the organisation and evaluation of health care in the community.

*BMC Family Practice* is part of the *BMC* series which publishes subject-specific journals focused on the needs of individual research communities across all areas of biology and medicine. We do not make editorial decisions on the basis of the interest of a study or its likely impact. Studies must be scientifically valid; for research articles this includes a scientifically sound research question, the use of suitable methods and analysis, and following community-agreed standards relevant to the research field.

Specific criteria for other article types can be found in the submission guidelines.

**BMC series - open, inclusive and trusted.**

Impact Factor: 1.751 (2016), Journal Citation Reports®

Giving authors in their area of expertise the opportunity to publish open access
- High visibility thanks to unrestricted online access
