BMC Medical Genetics

- Broad scope journal covering basic research and clinical genetics
- High quality peer-review service
- High global visibility with over 70,000 article accesses on average per month

*BMC Medical Genetics* is an open access journal publishing original peer-reviewed research articles in the effects of genetic variation in individuals, families and among populations in relation to human health and disease.

*BMC Medical Genetics* is part of the *BMC* series which publishes subject-specific journals focused on the needs of individual research communities across all areas of biology and medicine. We do not make editorial decisions on the basis of the interest of a study or its likely impact. Studies must be scientifically valid; for research articles this includes a scientifically sound research question, the use of suitable methods and analysis, and following community-agreed standards relevant to the research field.

Specific criteria for other article types can be found in the submission guidelines.
