BMC Physiology
Editor-in-Chief: K.H. Myburgh

- Considers all aspects of Physiology research
- Expert Editor-in-chief
- Research is freely available for redistribution

*BMC Physiology* is an open access, peer-reviewed journal that considers articles on cellular, tissue-level, organismal, functional, and developmental aspects of physiological processes.

*BMC Physiology* is part of the *BMC* series which publishes subject-specific journals focused on the needs of individual research communities across all areas of biology and medicine. We do not make editorial decisions on the basis of the interest of a study or its likely impact. Studies must be scientifically valid; for research articles this includes a scientifically sound research question, the use of suitable methods and analysis, and following community-agreed standards relevant to the research field.

Specific criteria for other article types can be found in the submission guidelines.

*BMC series* - open, inclusive and trusted.

Giving authors in their area of expertise the opportunity to publish open access

- High visibility thanks to unrestricted online access
- Rigorous peer-review and high-quality author services
- Creative Commons licensed – authors retain copyright
- Citation tracking and inclusion in bibliographic databases
- Easy compliance with open access mandates
