BMC Medical Education

➤ Altmetric scores, article accesses and citation information available
➤ Large international readership
➤ Rapid publication upon acceptance

*BMC Medical Education* is an open access journal publishing original peer-reviewed research articles in relation to the training of healthcare professionals, including undergraduate, postgraduate, and continuing education. The journal has a special focus on curriculum development, evaluations of performance, assessment of training needs and evidence-based medicine.

*BMC Medical Education* is part of the *BMC* series which publishes subject-specific journals focused on the needs of individual research communities across all areas of biology and medicine. We do not make editorial decisions on the basis of the interest of a study or its likely impact. Studies must be scientifically valid; for research articles this includes a scientifically sound research question, the use of suitable methods and analysis, and following community-agreed standards relevant to the research field.

Specific criteria for other article types can be found in the submission guidelines.

*BMC series - open, inclusive and trusted.*

Impact Factor: 1.572 (2016), Journal Citation Reports®

Giving authors in their area of expertise the opportunity to publish open access

➤ High visibility thanks to unrestricted online access
➤ Rigorous peer-review and high-quality author services
➤ Creative Commons licensed – authors retain copyright
➤ Citation tracking and inclusion in bibliographic databases
➤ Easy compliance with open access mandates
