Critical Ultrasound Journal
Editor-in-Chief: G. Volpicelli

► The Journal is intended to reach clinical practitioners and scientists interested in broadening their knowledge in the fields of ultrasound practice, research, education, technology and the network addressing the global needs of patients, institutions, services and communities living in out-of-hospital and in-hospital critical scenarios.

Critical Ultrasound Journal is a peer-reviewed open access journal published under the brand SpringerOpen. It is the official publication of WINFOCUS (World Interactive Network Focused on Critical UltraSound), the world’s leading scientific organization committed to developing point-of-care ultrasound practice, research, education, technology and networking and addressing the global needs of patients, institutions, services and communities living in out-of-hospital and in-hospital critical scenarios.

Critical Ultrasound Journal is an international, peer-reviewed journal designed for clinicians using point-of-care ultrasound in any environment or setting. The journal publishes editorials, reviews, original articles, short communications and case reports and is open for publication of supplements and abstracts of scientific meetings. By reaching audiences around the world, it plays a key role in bringing ultrasound to the patient’s bedside, where this technique can make the greatest difference. Requirements and guidelines for submission of papers can be obtained from the publisher.

The journal went open access in 2012, which means that all articles published since then are freely available online.

Giving authors in their area of expertise the opportunity to publish open access
► High visibility thanks to unrestricted online access
► Rigorous peer-review and high-quality author services
► Creative Commons licensed – authors retain copyright
► Citation tracking and inclusion in bibliographic databases
► Easy compliance with open access mandates
