Protein & Cell
Editor-in-Chief: Z. Rao

- Provides a forum to foster academic exchange among researchers across different fields of the life sciences
- Presents research highlights, news and views, and commentaries covering research policies and funding trends in China
- Covers the latest developments in multidisciplinary areas in biology and biomedicine, emphasizing protein and cell research

Protein & Cell publishes original research articles, reviews, and commentaries concerning the latest developments in multidisciplinary areas in biology and biomedicine, with an emphasis on protein and cell research.

Subject areas include biochemistry/biophysics, cell biology, developmental biology, genetics, immunology, microbiology, molecular biology, neuroscience, oncology, protein science, structural biology and translational medicine. In addition, Protein & Cell addresses research highlights, news and views, and commentaries covering research policies and funding trends in China, and provides a forum to foster academic exchange among researchers across different fields of the life sciences.

Protein & Cell is a peer-reviewed open access journal published monthly. The open access fees (article-processing charges) for this journal are kindly sponsored by Higher Education Press, Beijing Institutes of Life Science, Chinese Academy of Sciences and Biophysical Society of China. Authors can publish in the journal without any additional charges.

Impact Factor: 5.374 (2016), Journal Citation Reports®

Giving authors in their area of expertise
the opportunity to publish open access

- High visibility thanks to unrestricted online access
- Rigorous peer-review and high-quality author services
- Creative Commons licensed – authors retain copyright
- Citation tracking and inclusion in bibliographic databases
- Easy compliance with open access mandates
