Australasian Physical & Engineering Sciences in Medicine

The Official Journal of the Australasian College of Physical Scientists and Engineers in Medicine

Editor-in-Chief: M. Caon

- Covers the application of physics and engineering to medicine and biology
- 100% of authors who answered a survey reported that they would definitely publish or probably publish in the journal again

Australasian Physical & Engineering Sciences in Medicine (APESM) is a multidisciplinary forum for information and research on the application of physics and engineering to medicine and human physiology. APESM covers a broad range of topics that include but is not limited to:

- Medical physics in radiotherapy
- Medical physics in diagnostic radiology
- Medical physics in nuclear medicine
- Mathematical modelling applied to medicine and human biology
- Clinical biomedical engineering
- Feature extraction, classification of EEG, ECG, EMG, EOG, and other biomedical signals;
- Medical imaging - contributions to new and improved methods;
- Modelling of physiological systems
- Image processing to extract information from images, e.g. fMRI, CT, etc.;
- Biomechanics, especially with applications to orthopaedics.

Impact Factor: 1.171 (2016), Journal Citation Reports®
