Autoimmunity Highlights
Editor-in-Chief: N. Bizzaro

- Now indexed by PubMedCentral
- Presents material of interest to diverse professionals working on autoimmune diseases
- Examines all aspects of autoimmune diseases, including diagnosis, treatment and management
- Offers specific coverage of Rheumatoid arthritis, Coeliac disease, autoimmune thyroid disease, Diabetes and more

Autoimmunity Highlights is a peer-reviewed open access published under the Springer Open brand. The journal publishes papers related to the diverse aspects of autoimmunity, bridging the interests of the clinic, the laboratory and specialists involved in the complex world of autoimmunity diagnosis.

This international journal focuses on pathogenesis, immunology, genetics, molecular biology, diagnostic auto-antibody tests, epidemiology, pathophysiology and the treatment of autoimmune diseases. New challenges in the field receive special attention, among them genetics, molecular biology, genomics and proteomics, point-of-care testing (POCT), information technology and communication (ITC) and health economics.

The range of disorders covered is comprehensive, encompassing Connective tissue diseases; Rheumatoid arthritis; Antiphospholipid syndrome; Coeliac disease; Gastrointestinal autoimmune diseases; Vasculitis; Autoimmune thyroid diseases, diabetes, endocrine diseases, liver diseases and skin diseases; Neurologic autoimmunity; POCT, EBM, ITC and health economics; and more.

The journal went open access in 2015, which means that all articles published since then are freely available online.

Giving authors in their area of expertise the opportunity to publish open access
- High visibility thanks to unrestricted online access
- Rigorous peer-review and high-quality author services
- Creative Commons licensed – authors retain copyright
- Citation tracking and inclusion in bibliographic databases
- Easy compliance with open access mandates
