Agronomy for Sustainable Development
Official journal of the Institut National de la Recherche Agronomique (INRA)
Editors-in-Chief: S. Recous; J. Le Bot; J.-M. Meynard

- Wide-ranging coverage of interactions between cropping systems and other activities
- Covers topics from farming systems to agroclimatology, food safety to social issues

Agronomy for Sustainable Development (ASD) welcomes multidisciplinary articles that bridge agronomy with ecological, genetic, environmental, economic and social sciences. Monodisciplinary articles that will constitute the grounds of sustainability from environmental, economic or social viewpoints are also welcome. Systemic approaches at the livestock, field, farm, landscape and global scales, and participatory research are encouraged. ASD publishes original articles and review articles. Original articles should demonstrate a clear scientific breakthrough versus current knowledge. Contributions may be on either methodological approaches or approaches addressing major issues in the scope of the journal. Review articles report a critical evaluation of emerging topics. Meta-analyses should be submitted as review articles. Agronomy for Sustainable Development is a journal of the Institut National de la Recherche Agronomique (INRA).

It covers the following topics:

1. Agriculture and climate change

1.1. Agroclimatology

1.2. Adaptation to climate change

1.3. Mitigation of greenhouse gases

1.4. Renewable energies and bioproducts

1.5.

Impact Factor: 4.101 (2016), Journal Citation Reports®
