EURASIP Journal on Advances in Signal Processing
Editor-in-Chief: G. Leus

EURASIP Journal on Advances in Signal Processing is a peer-reviewed open access journal published under the brand SpringerOpen. It brings science and applications together with emphasis on both practical and theoretical aspects of signal processing in new and emerging technologies. It is directed as much at the practicing engineer as at the academic researcher. EURASIP Journal on Advances in Signal Processing will highlight the extended reach and the diverse applications of signal processing and encourage a cross-fertilization of techniques. All papers should attempt to bring theory to life with practical simulations and examples. EURASIP Journal on Advances in Signal Processing employs paperless, electronic review process to foster fast and speedy turnaround in review process.

Application areas include (but are not limited to): communications, networking, sensors and actuators, radar and sonar, medical imaging, biomedical applications, remote sensing, consumer electronics, computer vision, pattern recognition, robotics, fiber optic sensing/transducers, industrial automation, transportation, stock market and financial analysis, seismography, avionics.

The average time to first decision is only 40 days

Impact Factor: 1.961 (2016), Journal Citation Reports®

Giving authors in their area of expertise the opportunity to publish open access
► High visibility thanks to unrestricted online access
► Rigorous peer-review and high-quality author services
► Creative Commons licensed – authors retain copyright
► Citation tracking and inclusion in bibliographic databases
► Easy compliance with open access mandates
