Extreme Physiology & Medicine

Editor-in-Chief: M. Grocott; H. Montgomery

- Bridges the gap between clinical medical journals and the physiology journals
- A forum for research in ‘extreme’ or ‘boundary’ physiology
- Eminent international Editorial Board

*Extreme Physiology & Medicine* is an open access journal focussing on integrative human physiology under conditions of physiological stress, including that exerted by extreme environments, exercise and certain clinical conditions.

Giving authors in their area of expertise the opportunity to publish open access

- High visibility thanks to unrestricted online access
- Rigorous peer-review and high-quality author services
- Creative Commons licensed – authors retain copyright
- Citation tracking and inclusion in bibliographic databases
- Easy compliance with open access mandates

Electronic access
