Neotropical Entomology
Editor-in-Chief: E. Fontes

▶ Official Journal of the Sociedade Entomológica do Brasil (SEB)
▶ Publishes original basic and applied research on all fields of Entomology and Acarology
▶ A preferred forum for accessing information on the Neotropical Fauna
▶ Offers a diverse array of information for insects and mites, from systematics to pest management
▶ The best ranked Entomological journal from Latin America
▶ 100% of authors who answered a survey reported that they would definitely publish or probably publish in the journal again

Neotropical Entomology is a bimonthly journal, edited by the Sociedade Entomológica do Brasil (Entomological Society of Brazil) that publishes original articles produced by Brazilian and international experts in several subspecialties of entomology. These include bionomics, systematics, morphology, physiology, behavior, ecology, biological control, crop protection and acarology. The Forum section publishes, by invitation, extensive reviews and thought-provoking articles concerning contemporary issues in entomology.

Neotropical Entomology was founded in 1972 as Anais da Sociedade Entomológica do Brasil (Annals of the Entomological Society of Brazil).

Impact Factor: 0.756 (2016), Journal Citation Reports®
