Gels Horizons: From Science to Smart Materials

Series Ed.: V. Thakur

This series aims at providing a comprehensive collection of works on the recent advances and developments in the domain of Gels, particularly as applied to the various research fields of sciences and engineering disciplines. It covers a broad range of topics related to Gels ranging from Polymer Gels, Protein Gels, Self-Healing Gels, Colloidal Gels, Composites/Nanocomposites Gels, Organogels, Aerogels, Metallogels & Hydrogels to Micro/Nano gels. The series provides timely and detailed information on advanced synthesis methods, characterization and their application in a broad range of interrelated fields such as chemistry, physics, polymer science & engineering, biomedical & biochemical engineering, chemical engineering, molecular biology, mechanical engineering and materials science & engineering.

This Series accepts both edited and authored works, including textbooks, monographs, reference works, and professional books. The books in this series will provide a deep insight into the state-of-art of Gels and serve researchers and professionals, practitioners, and students alike.

Upcoming Volumes:

V.K. Thakur, M.K. Thakur (Eds.)
Hydrogels
Recent Advances

V.K. Thakur, M.K. Thakur (Eds.)
Polymer Gels
Synthesis and Characterization

V.K. Thakur, M.K. Thakur (Eds.)
Polymer Gels
Science and Fundamentals

V.K. Thakur, M.K. Thakur, S.I. Voicu (Eds.)
Polymer Gels
Perspectives and Applications
