Osteoporosis International

With other metabolic bone diseases
Co-Editors-in-Chief: J. Kanis; F. Cosman

► Provides an interdisciplinary platform for the communication of high quality original, experimental or clinical papers on all aspects of osteoporosis and other metabolic bone diseases
► Publishes studies pertaining to the diagnosis, prevention, treatment and management of osteoporosis, and the spectrum of disorders that deficiencies in bone density can produce
► 98% of authors who answered a survey reported that they would definitely publish or probably publish in the journal again

An international multi-disciplinary journal which is a joint initiative between the International Osteoporosis Foundation and the National Osteoporosis Foundation of the USA, Osteoporosis International provides a forum for the communication and exchange of current ideas concerning the diagnosis, prevention, treatment and management of osteoporosis and other metabolic bone diseases.

It publishes: original papers - reporting progress and results in all areas of osteoporosis and its related fields; review articles - reflecting the present state of knowledge in special areas of summarizing limited themes in which discussion has led to clearly defined conclusions; educational articles - giving information on the progress of a topic of particular interest; case reports - of uncommon or interesting presentations of the condition.

While focusing on clinical research, the Journal will also accept submissions on more basic aspects of research, where they are considered by the editors to be relevant to the human disease spectrum.

Impact Factor: 3.591 (2016), Journal Citation Reports®
