Archives of Microbiology
Editor-in-Chief: E. Stackebrandt

- 96% of authors who answered a survey reported that they would definitely publish or probably publish in the journal again

*Archives of Microbiology* publishes papers on all areas of basic research in microbiology.

Research papers must make a significant and original contribution to microbiology and be of interest to a broad readership. The results of any experimental approach that meets these objectives are welcome, particularly biochemical, molecular genetic, physiological, and/or physical investigations into microbial cells and their interactions with their environments, including their eukaryotic hosts.

Mini-reviews in areas of special topical interest and papers on medical microbiology, ecology and systematics, including description of novel taxa, are also published.

Theoretical papers and those that report analysis of 'mining' of data are acceptable in principle if new information, interpretation, or hypotheses emerge.

Details concerning the submission and publication procedures:

- No Page Charges
- No Fees for Online Color Images
- **Optional** Open Access Publication Fee (APC) – USD 3000,- / Euro 2200,-

Impact Factor: 1.600 (2016), Journal Citation Reports®
