- ▶ Free app available on iTunes and Google Play Store
- ▶ Presents high-quality research on all aspects of the dynamics of the global climate system
- ▶ Includes original research on the structure and behavior of the atmosphere, oceans, cryosphere, biomass and land surface
- ▶ Techniques include paleoclimatic, diagnostic, analytical and numerical modeling
- ▶ Also publishes reviews and papers emphasizing an integrated view of the physical and biogeochemical processes governing climate and climate change
- ▶ 98% of authors who answered a survey reported that they would definitely publish or probably publish in the journal again

The international journal Climate Dynamics provides for the publication of high-quality research on all aspects of the dynamics of the global climate system.

Coverage includes original paleoclimatic, diagnostic, analytical and numerical modeling research on the structure and behavior of the atmosphere, oceans, cryosphere, biomass and land surface as interacting components of the dynamics of global climate. Contributions are focused on selected aspects of climate dynamics on particular scales of space or time.

The journal also publishes reviews and papers emphasizing an integrated view of the physical and biogeochemical processes governing climate and climate change.

Impact Factor: 4.146 (2016), Journal Citation Reports®
