Pediatric Drugs
Editor: R. McNab

Pediatric Drugs promotes the optimization and advancement of all aspects of pharmacotherapy for healthcare professionals interested in pediatric drug therapy (including vaccines). The program of reviews and original research articles provides healthcare decision makers with clinically applicable knowledge on issues relevant to drug therapy in all areas of neonatology and the care of children and adolescents, including the pharmacology, efficacy and adverse effects of the major classes of drugs; information on newly developed drugs and drug classes; the therapeutic implications of latest research into the aetiology of pediatric conditions; and the practical management of specific clinical situations.

Articles published in Pediatric Drugs may be accompanied by plain language summaries, to assist patients, caregivers and others in understanding important medical advances.

All manuscripts are subject to peer review by international experts. Letters to the Editor are welcomed and will be considered for publication.

Impact Factor: 2.147 (2016), Journal Citation Reports®
