The aim of JSERD, a fully open access journal published under the brand SpringerOpen, is to inform the readers about state of the art of software engineering by publishing high quality papers that represent results of consolidated research and innovations in software engineering and related areas. JSERD topics of interest include, but are not restricted to:

- Architecture, design and frameworks
- Social and ethical aspects of software engineering
- Model-driven software engineering
- Generative or transformation-based development
- Requirements engineering
- Software engineering supported by multi and hypermedia
- Component-based software engineering
- Knowledge-based software engineering
- Experimental software engineering
- Tools and software engineering environments
- Software dependability
- Theoretical foundations of software engineering
- Software project management
- Software maintenance, reverse engineering and re-engineering
- Methods of software analysis and design
- Software metrics
- Agent-based software development
- Aspect-oriented software development
- Modelling and enactment of software processes, rigorous and agile
- Software engineering ontologies
- Software safety, security, privacy and risks
- Software quality
- Software reuse
- Software testing
- Software verification, validation and inspection

Giving authors in their area of expertise the opportunity to publish open access

- High visibility thanks to unrestricted online access
- Rigorous peer-review and high-quality author services
- Creative Commons licensed – authors retain copyright
- Citation tracking and inclusion in bibliographic databases
- Easy compliance with open access mandates
