Journal of Modern Transportation
Editor-in-Chief: Y. Zhao

► Covers theoretical and technical achievements in modern transportation systems, with focus on rail transit systems especially high-speed railways, superconductivity and magnetic levitation technologies, and interdisciplinary research of various traffic systems.
► Presents an attractive mix of authoritative and comprehensive reviews, original articles on cutting-edge research and brief communications
► Offers rapid review and publication of articles

The *Journal of Modern Transportation (JMT)* is a fully sponsored, peer-reviewed open access journal published under the brand SpringerOpen. It provides a platform for scholars to publish their works in the general area of transportation, concerned with analysis, planning, design, operations, technologies, and economics of modern transportation and traffic systems with focus on high-speed railway technological and theoretical achievements across the world, especially in China.

Giving authors in their area of expertise the opportunity to publish open access

► High visibility thanks to unrestricted online access
► Rigorous peer-review and high-quality author services
► Creative Commons licensed – authors retain copyright
► Citation tracking and inclusion in bibliographic databases
► Easy compliance with open access mandates
