Chemical and Biological Technologies in Agriculture
Editor-in-Chief: A. Piccolo

- Provides a venue for scientists from a wide range of disciplines to publish research related to agricultural problems.
- Encourages participation and collaboration from scientists both working in academia and in agrochemical and related industries.
- Fully open access peer-reviewed journal accessible to everyone worldwide.

Chemical and Biological Technologies in Agriculture (CBTA) offers the first opportunity to stimulate discussion on the latest chemical and biochemical knowledge and how this can be transferred to practical applications in agriculture - with the ultimate aim of addressing the problem of how we will sustain a growing world population.

Giving authors in their area of expertise the opportunity to publish open access
- High visibility thanks to unrestricted online access
- Rigorous peer-review and high-quality author services
- Creative Commons licensed – authors retain copyright
- Citation tracking and inclusion in bibliographic databases
- Easy compliance with open access mandates

Electronic access
