International Journal of STEM Education
Editor-in-Chief: Y. Li

► Presents original research and research syntheses in STEM education
► Provides an arena to present and promote scholarly exchange and discussion on emerging issues and frontier research in STEM education
► Contributes to the development of translational STEM education research into policy recommendation and practice including programs, procedures, or strategies for STEM education improvement
► Publishes reports and case studies that showcase evidence-based changes in STEM curriculum or pedagogical practices in different education systems around the world

The International Journal of STEM Education is a multidisciplinary journal in subject-content education that focuses on the study of teaching and learning in science, technology, engineering, and mathematics (STEM). It is being established as a brand new, forward looking journal in the field of education. As a peer-reviewed journal, it is positioned to promote research and educational development in the rapidly evolving field of STEM education around the world.

Giving authors in their area of expertise the opportunity to publish open access
► High visibility thanks to unrestricted online access
► Rigorous peer-review and high-quality author services
► Creative Commons licensed – authors retain copyright
