Academic Psychiatry
Editor-in-Chief: L.W. Roberts

- Offers papers on innovations in psychiatric education and on professional development
- Presents papers from workshops, and publishes single-topic theme issues
- Also includes commentaries and letters
- Average time for submission to first decision = 21 days

The Journal’s mission supports work that furthers knowledge and stimulates evidence-based advances in academic medicine in six key domains: education, leadership, finance and administration, career and professional development, ethics and professionalism, and health and well-being.

Original articles present empirical research, systematic reviews, or critical analyses that inform one of these six key domains, important to academic psychiatry, behavioral sciences, and the health professions.

Academic Psychiatry often assembles collections of papers on themes pertinent to its readership. The journal also invites full and brief empirical reports, as well as contributions to the educational resource column, the media column, commentaries, position papers, book reviews, poems, and letters to the editor.

Impact Factor: 1.246 (2016), Journal Citation Reports®
