Revista Chilena de Historia Natural
Editor-in-Chief: P. Ojeda

- Open Access journal spanning all aspects of empirical and theoretical biology
- From botany and zoology to physiology and behavioral ecology, systematics, biogeography and evolution, and more
- Official publication of the Sociedad de Biologia de Chile

This fully Open Access journal presents original research dealing with past and present phenomena, from the organism level to higher planes of biological organization, including both empirical and theoretical studies on all kinds of taxa and environments. Topic areas covered include botany and zoology; physiology and behavioral ecology; population biology; community and ecosystem ecology; systematics, biogeography and evolution. Known by the acronym RCHN, the journal offers contributions in seven categories: research articles, review articles, reviews, forum and replies, letters to the editor and special thematic sections (mini reviews, symposia, etc.).

RCHN is the official publication of Sociedad de Biologia de Chile, the Society of Biology of Chile.

Impact Factor: 0.702 (2016), Journal Citation Reports®

Giving authors in their area of expertise the opportunity to publish open access

- High visibility thanks to unrestricted online access
- Rigorous peer-review and high-quality author services
- Creative Commons licensed – authors retain copyright
- Citation tracking and inclusion in bibliographic databases
- Easy compliance with open access mandates
