Environmental Processes
An International Journal
Editor-in-Chief: V.A. Tsihrintzis

- Presents original research and technical papers on the natural and anthropogenic environment
- Aims at improved understanding of environmental processes leading to the solution of environmental problems
- An official journal of the European Water Resources Association (EWRA)

*Environmental Processes* covers: processes related to the interactions of the water, atmosphere, and soil-sediment environments with the humans and the biosphere; environmental flow processes, hydrodynamics and hydrology; pollutant physical, chemical and biological processes, including pollutant sources and origin, fate, dispersion and degradation, transport, deposition and accumulation, and impacts on human health and environmental quality; interaction processes between the social, cultural, economic and natural environments; evaluation of currently applied and new proposed technologies for pollutant treatment and the protection of the environment; testing of currently used and new proposed monitoring, instrumentation and analysis techniques related to the environmental processes; educational, regulatory, and research needs on environmental processes and protection.
