Journal of Clinical Movement Disorders
Editor-in-Chief: S. Frucht

- First fully open access clinical journal dedicated to movement disorders
- No page restrictions and ability to support video files
- Internationally renowned expert Editorial Board

Journal of Clinical Movement Disorders is the first fully open access clinical journal dedicated to the study of the etiology, diagnosis, evaluation and treatment of movement disorders. JCMD provides a high-visibility forum for the rapid dissemination of cutting-edge research and reviews that explore the ways in which translational research approaches are changing the evaluation and treatment of patients with movement disorders in clinical practice in the 21st century. JCMD encourages the submission of research detailing novel and emerging treatments, unusual phenotypes and current controversies.

Giving authors in their area of expertise the opportunity to publish open access
- High visibility thanks to unrestricted online access
- Rigorous peer-review and high-quality author services
- Creative Commons licensed – authors retain copyright
- Citation tracking and inclusion in bibliographic databases
- Easy compliance with open access mandates

Electronic access
