International Journal of Research in Undergraduate Mathematics Education
Editor-in-Chief: K. Marrongelle; C. Rasmussen; M.O.J. Thomas

- International in scope and coverage
- Offers comprehensive coverage of research in post-secondary instruction
- Presents new ideas and developments of major importance in post-secondary mathematical education, including how mathematicians go about their professional practice
- Publishes empirical, theoretical and methodological reports on learning and teaching of undergraduate and graduate students
- No restriction on the level of mathematical content
- Reflects both the variety of research concerns within the field and the range of methods used to study them
- The journal emphasizes high-level articles that go beyond local interest
- All articles go through a rigorous, double-blind peer review process

The *International Journal of Research in Undergraduate Mathematics Education* is dedicated to the interests of post-secondary mathematics education research. It welcomes original research, including empirical, theoretical, and methodological reports of learning and teaching of undergraduate and graduate students, rather than curricular descriptions or anecdotal reflections on practice.
