Military Medical Research
Editor-in-Chief: X.-B. Fu; X.-B. Fu

▶ Broad scope journal covers all area of military medicine and trauma including disaster preparation and disaster medicine
▶ Open access- widest global visibility for your research
▶ Fully sponsored by the journal, so authors do not need to pay the APCs

Military Medical Research is an open access, peer-reviewed journal publishing cutting-edge findings on basic medical science and clinical research that is related to military medicine. The journal considers articles mainly related to the fields of trauma and war surgery, disaster medicine, emergency medicine and critical care, infectious diseases and military psychiatry/psychology.

Topics of interest include but not limited to: CBRN (chemical, biological, radiological, nuclear) medical countermeasures, mass casualty readiness and response, environmental medicine (including austere environments such as battlefields, high altitude, extreme cold and hot environments), aerospace medicine and marine medicine, and military training as well as health service.

Giving authors in their area of expertise the opportunity to publish open access

▶ High visibility thanks to unrestricted online access
▶ Rigorous peer-review and high-quality author services
▶ Creative Commons licensed – authors retain copyright
▶ Citation tracking and inclusion in bibliographic databases
▶ Easy compliance with open access mandates
