Contraception and Reproductive Medicine

Editor-in-Chief: A. Christy; D. Shoupe

- Examines the latest research and applications on male and female contraception
- Edited by leading experts
- Internationally focused providing a global platform for dissemination of your research

Contraception and Reproductive Medicine is an online, peer reviewed journal that is designed to provide open access to high-quality clinical research on contraceptive technology and reproductive medicine. The journal’s aim is to promote academic discussions on contraceptive effectiveness, side-effect profiles, acceptability, metabolic effects and impact on short and long-term health.

Giving authors in their area of expertise the opportunity to publish open access

- High visibility thanks to unrestricted online access
- Rigorous peer-review and high-quality author services
- Creative Commons licensed – authors retain copyright
- Citation tracking and inclusion in bibliographic databases
- Easy compliance with open access mandates
