Clinical Diabetes and Endocrinology

Editor-in-Chief: M. Tan

- Published in collaboration with the University of Michigan
- Fully open-access, ensuring high visibility for authors’ work
- Expert international Editorial Board

Clinical Diabetes and Endocrinology is a peer-reviewed, online, open access journal that aims to promote better care for people with diabetes and endocrine disease. To achieve this, the journal publishes new knowledge, both research and clinical, on various aspects of diabetes and endocrine diseases and their management for health care professionals.

Giving authors in their area of expertise the opportunity to publish open access

- High visibility thanks to unrestricted online access
- Rigorous peer-review and high-quality author services
- Creative Commons licensed – authors retain copyright
- Citation tracking and inclusion in bibliographic databases
- Easy compliance with open access mandates

Electronic access
