**Journal of Open Innovation: Technology, Market, and Complexity**
Editor-in-Chief: J.J. Yun

- Publishes research and theoretical, methodological and applied work in open innovation, entrepreneurship, complexity and more
- Interdisciplinary scope spans management, public administration, economics and more
- Affiliated with the Society of Open Innovation

*Journal of Open Innovation: Technology, Market, and Complexity (JOItmC)*, a peer-reviewed open access journal published under the SpringerOpen brand, combines interdisciplinary research, as well as theoretical, methodological, and applied work on open innovation, open business model, entrepreneurship, complexity, and evolutionary change in the economy.

Additionally, JOItmC highly welcomes developing cases of business models and studies that make use of non-traditional methodologies such as simulation, agent-based modelling, network analysis, and system dynamics.

Articles published in the journal cover original research across multiple disciplines, including management, public administration, politics, economics, sociology, history of science, philosophy of science, science communication, natural science, and engineering.

Giving authors in their area of expertise the opportunity to publish open access

- High visibility thanks to unrestricted online access
- Rigorous peer-review and high-quality author services
- Creative Commons licensed – authors retain copyright
- Citation tracking and inclusion in bibliographic databases
- Easy compliance with open access mandates
