Fields Mathematics Education Journal
Editor-in-Chief: D. Martinovic; D. Kotsopoulos

Founded in 1992, the Fields Institute is a center for mathematical research activity - a place where individuals from Canada and abroad, from business, industry, education, and financial institutions, come together to carry out research and formulate problems of mutual interest. For almost two decades now, teachers, curriculum consultants, graduate students, pre-service teachers, mathematics education researchers, mathematicians, ministry and policy consultants, and members of the general public with an interest in mathematics education have been gathering monthly at the Fields Institute for the Fields Mathematics Education Forum to explore issues in mathematics education. The Steering Committee of the Fields Mathematics Education Forum is pleased to announce the launch of the Fields Mathematics Education Journal (FMEJ).

This international peer-reviewed online journal aims to provide open access to the range of themes that attract attention of the mathematics education community internationally. FMEJ has an international editorial board. All submissions are double-blind peer-reviewed. The views expressed or implied in the publication, unless otherwise noted, should not be interpreted as official positions of the Fields Institute for Research at the Mathematical Sciences, the founding organization of the journal. Manuscripts previously published in other journals, books or electronic venues are not accepted for review.

Giving authors in their area of expertise the opportunity to publish open access

- High visibility thanks to unrestricted online access
- Rigorous peer-review and high-quality author services
- Creative Commons licensed – authors retain copyright
- Citation tracking and inclusion in bibliographic databases
- Easy compliance with open access mandates

Electronic access
