Cardio-Oncology

Editor-in-Chief: S.E. Lipshultz
Managing Editor: V. Franco
Deputy Editor: J. Carver; G. Minotti

- The only journal devoted exclusively to this emerging specialty
- Internationally renowned expert Editorial Board
- Rapid publication for your work

The editorial mission of Cardio-Oncology is to advance the science and practice of this emerging field to find a balance between oncologic efficacy and reducing adverse cardiovascular effects.

The only journal devoted exclusively to this growing specialty, Cardio-Oncology provides an international forum for communicating the latest findings and state-of-the-art reviews, filling a critical gap in the science and clinical practice of this important field. The journal serves as essential reading for basic researchers, drug developers, adult and pediatric onco-hematologists, cardiologists, radiologists, surgical oncologists, internists, geneticists, epidemiologists, and other health care scientists and providers.

Giving authors in their area of expertise the opportunity to publish open access
- High visibility thanks to unrestricted online access
- Rigorous peer-review and high-quality author services
- Creative Commons licensed – authors retain copyright
