IPSJ Transactions on Computer Vision and Applications

Editor-in-Chief: H. Saito

IPSJ Transactions on Computer Vision and Applications (CVA) is a peer-reviewed open access journal published under the brand SpringerOpen. The journal is dedicated to publishing high-quality research articles, reviews, and letters in all areas of fundamental and applied computer vision and its applications. In addition to traditional core subject areas in computer vision, the journal also covers a broad spectrum of pattern recognition research including, but not limited to, early vision, data structures and representations, machine learning, and matching and recognition.

IPSJ Transactions on Computer Vision and Applications has been publishing Open Access articles from all over the world through a fair, rigorous, and rapid review process, guided by an international editorial board of eminent researchers.

Giving authors in their area of expertise the opportunity to publish open access
- High visibility thanks to unrestricted online access
- Rigorous peer-review and high-quality author services
- Creative Commons licensed – authors retain copyright
- Citation tracking and inclusion in bibliographic databases
- Easy compliance with open access mandates
