The study of renal replacement therapy incorporates hemodialysis, peritoneal dialysis, blood purification, renal transplantation and regenerative medicine practices. The new, open access journal, Renal Replacement Therapy, aims to promote worldwide discussion and collaboration related to this field.

Contributions are encouraged from a global perspective across many disciplines, including chronic kidney disease (CKD), acute kidney injury (AKI), critical care medicine and intensive care, bone and mineral metabolism, anemia and iron metabolism, infection, cardiac disease, cerebral disease, diabetes mellitus, hypertension, nutrition, and related social issues.
