Automotive and Engine Technology
The International Journal of WKM
Editor-in-Chief: L. Eckstein; H. Eichlseder

▶ Covers the latest progress in every aspect of passenger car and commercial vehicle engineering
▶ Offers in-depth articles on engine development and technology
▶ Official academic organ of WKM, The Scientific Society for Automotive and Engine Technology

This journal is the official academic organ of WKM, The Scientific Society for Automotive and Engine Technology. Its focus is on the latest R&D findings on every aspect of passenger car and commercial vehicle engineering on the one hand, and engine development and technology on the other hand. Expert authors from science and industry report on individual research projects as well as on latest development of vehicles, their engines and other components. This journal provides in-depth technical articles that give an exclusive insight into progress in automotive engineering and engine technology, constituting an essential source of information for all automotive engineers worldwide.
