Living Reviews in Relativity

Editor-in-Chief: B. Iyer

- Offers critical reviews of research in all areas of relativity
- “Living” articles are kept up-to-date by their authors
- Published under the auspices of the Max Planck Society and ISGRG

Living Reviews in Relativity is a peer-reviewed, full open access, and exclusively online journal, publishing freely available reviews of research in all areas of relativity. Articles are solicited from leading authorities and are directed towards the scientific community at or above the graduate-student level. They provide critical reviews of the current state of research and available sources in the fields they cover. All contributions are subject to single-blind peer review by at least two referees.

Living Reviews is unique in maintaining a suite of high-quality reviews, which are kept up-to-date by the authors. This is the meaning of the word “living” in the journal's title.

Living Reviews in Relativity was founded by the Max Planck Institute for Gravitational Physics (Albert Einstein Institute) in 1998.

Cover figure: Numerical simulation of two inspiralling black holes that merge to form a new black hole. The image shows the apparent horizons and the gravitational waves produced. Shown are either the real and/or imaginary part of the curvature scalar Ψ_{i4} .

Impact Factor: 23.333 (2017), Journal Citation Reports®

Giving authors in their area of expertise the opportunity to publish open access

- High visibility thanks to unrestricted online access
- Rigorous peer-review and high-quality author services
- Creative Commons licensed – authors retain copyright
- Citation tracking and inclusion in bibliographic databases
- Easy compliance with open access mandates
