Living Reviews in Computational Astrophysics

Editor-in-Chief: E. Müller

Living Reviews in Computational Astrophysics is a new peer-reviewed open access journal. We aim at offering a comprehensive survey of research in computational astrophysics that physicists will know is up-to-date and reliable. *Living Reviews* is unique in that it only publishes refereed review articles whose authors commit to update them regularly.

Living Reviews in Computational Astrophysics was founded by the Max Planck Institute for Astrophysics (MPA) in 2014. Currently, APCs are fully covered by the MPA and Springer.

Giving authors in their area of expertise
the opportunity to publish open access

- High visibility thanks to unrestricted online access
- Rigorous peer-review and high-quality author services
- Creative Commons licensed – authors retain copyright
- Citation tracking and inclusion in bibliographic databases
- Easy compliance with open access mandates
