BioPhysical Economics and Resource Quality
Editor: U. Bardi; G. Giraud; C.A.S. Hall

- Explores systemic connections and dynamic interactions among energy, food, water, and other resources
- Examines the relationship of resource quantity and quality with markets, economic growth, urban sustainability, and technological change
- Promotes an integrated approach to the global challenges of human well-being and sustainability

The journal provides scientists, economists, partners in industry, and policy makers with objective, multidisciplinary research and commentary on these critical issues.
