Organizational Design and Enterprise Engineering
Editors-in-Chief: H.A. Proper; R. Magalhães

- Focuses on organizational design, business (process) engineering, business process optimization, information systems engineering, enterprise architecture, and enterprise engineering in general
- Establishes a common ground between organizational sciences, business informatics, and computer science
- Intertwines design, construction, and change of information technology supported organizations
- Emphasizes practical issues of information technology implementation in real-life organizations

This journal helps break down the us-and-them mindset that blocks strategic and operational thinking in organizations. It presents papers using a model-enabled, rather than model-centric or model-oriented approach, to reach both IT and organizational leaders.
