Archive of Applied Mechanics

Editor-in-Chief: R. Kienzler

- Presents new results and methods in solid and fluid mechanics, dynamics, vibrations and control
- Includes related disciplines useful to engineering practice

Archive of Applied Mechanics aims to disseminate new results and methods of scientific research in the field of solid and fluid mechanics, dynamics, vibrations and control. Material modeling, fracture and damage mechanics, continuum mechanics in general, structural mechanics, biomechanics and hydrodynamics are especially emphasized. Included are related disciplines, in a form useful to engineering practice. New analytical, numerical and experimental methods suited to research in the above mentioned subjects are welcomed.

Archive of Applied Mechanics was founded as “Ingenieur-Archiv” in 1929 (Vol. 1) by R. Grammel. The title was changed to “Archive of Applied” Mechanics in 1991.

Impact Factor: 1.490 (2016), Journal Citation Reports®
