The Journal of Basic and Applied Zoology

- Under the responsibility of the Egyptian German Society for Zoology
- Expert Peer Review
- Global audience

The Journal of Basic and Applied Zoology (JOBAZ) is a Peer Reviewed Open Access Journal.

JOBAZ is under the responsibility of The Egyptian German Society for Zoology.

Sections:

- **Physiology and Ecology** publishes original articles concerned with the study of the different physiological processes such as circulation, excretion, endocrinology, neurobiology, enzymology, nutrition, metabolism, immunology, as well as mechanisms of toxicity, regulatory mechanisms and ecological physiology.

- **Vertebrate Anatomy and Embryology** publishes studies that deal with adaptational mechanisms and evolutionary principles of development, molecular taxonomy and teratogenicity, as well as biodiversity and fish biology.

- **Cell Biology and Genetics** covers studies in molecular cell biology, genetics, and epigenetics, as well as cancer biology.

- **Invertebrates and Parasitology** publishes articles in advanced researches in both fields of invertebrates, parasitology and related subjects.

- **Entomology** covers all fields of entomological research from the basic and experimental to the applied.

Giving authors in their area of expertise the opportunity to publish open access

- High visibility thanks to unrestricted online access
- Rigorous peer-review and high-quality author services
- Creative Commons licensed – authors retain copyright
- Citation tracking and inclusion in bibliographic databases
- Easy compliance with open access mandates
