Use R!

Series Editors: R. Gentleman, K. Hornik, G. Parmigiani

This series of inexpensive and focused books on R will publish shorter books aimed at practitioners. Books can discuss the use of R in a particular subject area (e.g., epidemiology, econometrics, psychometrics) or as it relates to statistical topics (e.g., missing data, longitudinal data). In most cases, books will combine LaTeX and R so that the code for figures and tables can be put on a website. Authors should assume a background as supplied by Dalgaard's *Introductory Statistics with R* or other introductory books so that each book does not repeat basic material.
