Studies in Computational Intelligence

Series Ed.: J. Kacprzyk

The series "Studies in Computational Intelligence" (SCI) publishes new developments and advances in the various areas of computational intelligence – quickly and with a high quality. The intent is to cover the theory, applications, and design methods of computational intelligence, as embedded in the fields of engineering, computer science, physics and life sciences, as well as the methodologies behind them. The series contains monographs, lecture notes and edited volumes in computational intelligence spanning the areas of neural networks, connectionist systems, genetic algorithms, evolutionary computation, artificial intelligence, cellular automata, self-organizing systems, soft computing, fuzzy systems, and hybrid intelligent systems. Of particular value to both the contributors and the readership are the short publication timeframe and the world-wide distribution, which enable both wide and rapid dissemination of research output.

Recently published:

J. Grekow

From Content-based Music Emotion Recognition to Emotion Maps of Musical Pieces

Vol. 747

B. Panda, S. Sharma, U. Batra (Eds.)

Innovations in Computational Intelligence

Best Selected Papers of the Third International Conference on REDSET 2016, Vol. 713

H. Lu, X. Xu (Eds.)

Artificial Intelligence and Robotics

Vol. 752

Upcoming Volumes:

K. Shaalan, A.E. Hassanien, F. Tolba (Eds.)

Intelligent Natural Language Processing: Trends and Applications

Vol. 740

Y. Bi, S. Kapoor, R. Bhatia (Eds.)

Intelligent Systems and Applications

Extended and Selected Results from the SAI Intelligent Systems Conference (IntelliSys) 2016, Vol. 751

I. Zelinka, P. Vasant, V.H. Duy, T.T. Dao (Eds.)

Innovative Computing, Optimization and Its Applications

Modelling and Simulations, Vol. 741
