Problem Books in Mathematics

Series Ed.: P. Winkler

Books in this series are devoted exclusively to problems - challenging, difficult, but accessible problems. They are intended to help at all levels - in college, in graduate school, and in the profession. Arthur Engels "Problem-Solving Strategies" is good for elementary students and Richard Guys "Unsolved Problems in Number Theory" is the classical advanced prototype. The series also features a number of successful titles that prepare students for problem-solving competitions.

Recently published:

H. Sedrakyan, N. Sedrakyan

The Stair-Step Approach in Mathematics

V. Brayman, A. Kukush

Undergraduate Mathematics Competitions (1995–2016)

Taras Shevchenko National University of Kyiv

H. Sedrakyan, N. Sedrakyan

Geometric Inequalities

Methods of Proving

Upcoming Volumes:

A. Caminha Muniz Neto

An Excursion through Elementary Mathematics, Volume III

Discrete Mathematics and Polynomial Algebra

A. Caminha Muniz Neto

An Excursion through Elementary Mathematics, Volume II

Euclidean Geometry

H. Sedrakyan, N. Sedrakyan

Algebraic Inequalities
