Computational Music Science

Series Editors: G. Mazzola, M. Andreatta

About this series - The CMS series covers all topics dealing with essential usage of mathematics for the formal conceptualization, modeling, theory, computation, and technology in music.

Comprehensiveness - The series comprises symbolic, physical, and psychological reality, including areas such as mathematical music theory, musical acoustics, performance theory, sound engineering, music information retrieval, AI in music, programming, soft- and hardware for musical analysis, composition, performance, and gesture. The CMS series also includes mathematically oriented or computational aspects of music semiotics, philosophy, and psychology.

Quality - All volumes in the CMS series are published according to rigorous peer review, based on the editors' preview and selection and adequate refereeing by independent experts.

Collaboration - The editors of this series act in strong collaboration with the Society for Mathematics and Computation in Music and other professional societies and institutions.
