# Proceedings of ICDMC 2019

## Design, Materials, Cryogenics, and Constructions

- Discusses a wide range of topics in mechanical engineering
- Covers latest research in cryogenic systems and smart materials, and their applications
- Presents selected contributions from the international conference ICDMC 2019

This book comprises select proceedings of the International Conference on Design, Materials, Cryogenics and Constructions (ICDMC 2019). The chapters cover latest research in different areas of mechanical engineering such as additive manufacturing, automation in industry and agriculture, combustion and emission control, CFD, finite element analysis, and engineering design. The book also focuses on cryogenic systems and low-temperature materials for cost-effective and energy-efficient solutions to current challenges in the manufacturing sector. Given its contents, the book can be useful for students, academics, and practitioners.
