Table of Contents

Invited Talks

Self-Adjusting Computation ........................................... 1
  Robert Harper

The Past, Present, and Future of Web Search Engines ............. 3
  Monika Henzinger

What Do Program Logics and Type Systems Have in Common? .... 4
  Martin Hofmann

Feasible Proofs and Computations: Partnership and Fusion ........ 8
  Alexander A. Razborov

Grammar Compression, LZ-Encodings, and String Algorithms
  with Implicit Input ................................................ 15
  Wojciech Rytter

Testing, Optimization, and Games ................................... 28
  Mihalis Yannakakis

Contributed Papers

Deciding Knowledge in Security Protocols Under Equational Theories ... 46
  Martín Abadi, Véronique Cortier

Representing Nested Inductive Types Using W-Types ............... 59
  Michael Abbott, Thorsten Altenkirch, Neil Ghani

Algorithms for Multi-product Pricing ................................ 72
  Gagan Aggarwal, Tomás Feder, Rajeev Motwani, An Zhu

Exponential Lower Bounds for the Running Time of DPLL Algorithms
  on Satisfiable Formulas ........................................... 84
  Michael Alekhnovich, Edward A. Hirsch, Dmitry Itsykson

Linear and Branching Metrics for Quantitative Transition Systems ... 97
  Luca de Alfaro, Marco Faella, Mariëlle Stoelinga

Learning a Hidden Subgraph ........................................ 110
  Noga Alon, Vera Asodi

Optimal Reachability for Weighted Timed Games .................... 122
  Rajeev Alur, Mikhail Bernadsky, P. Madhusudan
Wavelength Assignment in Optical Networks with Fixed Fiber Capacity .............................................. 134  
Matthew Andrews, Lisa Zhang

External Memory Algorithms for Diameter and All-Pairs Shortest-Paths on Sparse Graphs ........................................ 146  
Lars Arge, Ulrich Meyer, Laura Toma

A $\lambda$-Calculus for Resource Separation .......................................................... 158  
Robert Atkey

The Power of Verification for One-Parameter Agents ............................................ 171  
Vincenzo Auletta, Roberto De Prisco, Paolo Penna, Giuseppe Persiano

Group Spreading: A Protocol for Provably Secure Distributed Name Service ..................... 183  
Baruch Awerbuch, Christian Scheideler

Further Improvements in Competitive Guarantees for QoS Buffering .............................. 196  
Nikhil Bansal, Lisa K Fleischer, Tracy Kimbrel, Mohammad Mahdian, Baruch Schieber, Maxim Sviridenko

Competition-Induced Preferential Attachment ................................................... 208  
N. Berger, C. Borgs, J.T. Chayes, R.M. D’Souza, R.D. Kleinberg

Approximating Longest Directed Paths and Cycles .............................................. 222  
Andreas Björklund, Thore Husfeldt, Sanjeev Khanna

Definitions and Bounds for Self-Healing Key Distribution Schemes .......................... 234  
Carlo Blundo, Paolo D’Arco, Alfredo De Santis

Tree-Walking Automata Cannot Be Determinized ................................................. 246  
Mikołaj Bojańczyk, Thomas Colcombet

Projecting Games on Hypercoherences ................................................................. 257  
Pierre Boudes

An Analog Characterization of Elementarily Computable Functions over the Real Numbers .......................................................... 269  
Olivier Bournez, Emmanuel Hainry

Model Checking with Multi-valued Logics ............................................................... 281  
Glenn Bruns, Patrice Godefroid

The Complexity of Partition Functions ................................................................. 294  
Andrei Bulatov, Martin Grohe

Comparing Recursion, Replication, and Iteration in Process Calculi .......................... 307  
Nadia Busi, Maurizio Gabbrielli, Gianluigi Zavattaro
Dynamic Price Sequence and Incentive Compatibility ................ 320
   Ning Chen, Xiaotie Deng, Xiaoming Sun, Andrew Chi-Chih Yao

The Complexity of Equivariant Unification ............................... 332
   James Cheney

Coordination Mechanisms .................................................. 345
   George Christodoulou, Elias Koutsoupias, Akash Nanavati

Online Scheduling of Equal-Length Jobs: Randomization and
Restarts Help ................................................................. 358
   Marek Chrobak, Wojciech Jawor, Jiří Sgall, Tomáš Tichý

Efficient Computation of Equilibrium Prices for Markets with
Leontief Utilities ............................................................ 371
   Bruno Codenotti, Kasturi Varadarajan

Coloring Semirandom Graphs Optimally .................................. 383
   Amin Coja-Oghlan

Sublinear-Time Approximation for Clustering Via Random Sampling . 396
   Artur Czumaj, Christian Sohler

Solving Two-Variable Word Equations ..................................... 408
   Robert Dąbrowski, Wojtek Plandowski

Backtracking Games and Inflationary Fixed Points ...................... 420
   Anuj Dawar, Erich Grädel, Stephan Kreutzer

A PTAS for Embedding Hypergraph in a Cycle ............................ 433
   Xiaotie Deng, Guojun Li

Towards an Algebraic Theory of Typed Mobile Processes .............. 445
   Yuxin Deng, Davide Sangiorgi

Ecological Turing Machines .................................................. 457
   Bruno Durand, Andrei Muchnik, Maxim Ushakov,
   Nikolai Vereshchagin

Locally Consistent Constraint Satisfaction Problems .................. 469
   Zdeněk Dvořák, Daniel Král’, Ondřej Pangráč

Quantum Query Complexity of Some Graph Problems .................. 481
   Christoph Dürr, Mark Heiligman, Peter Høyer, Mehdi Mhalla

A Domain Theoretic Account of Picard’s Theorem ...................... 494
   A. Edalat, D. Pattinson

Interactive Observability in Ludics ....................................... 506
   Claudia Faggian
Easily Refutable Subformulas of Large Random 3CNF Formulas

Uriel Feige, Eran Ofek

On Graph Problems in a Semi-streaming Model

Joan Feigenbaum, Sampath Kannan, Andrew McGregor, Siddharth Suri, Jian Zhang

Linear Tolls Suffice: New Bounds and Algorithms for Tolls in Single Source Networks

Lisa Fleischer

Bounded Fixed-Parameter Tractability and log^2 n Nondeterministic Bits

Jörg Flum, Martin Grohe, Mark Weyer

Exact (Exponential) Algorithms for Treewidth and Minimum Fill-In

Fedor V. Fomin, Dieter Kratsch, Ioan Todinca

Fast Parameterized Algorithms for Graphs on Surfaces: Linear Kernel and Exponential Speed-Up

Fedor V. Fomin, Dimitrios M. Thilikos

Selfish Unsplittable Flows

Dimitris Fotakis, Spyros Kontogiannis, Paul Spirakis

A General Technique for Managing Strings in Comparison-Driven Data Structures

Gianni Franceschini, Roberto Grossi

Greedy Regular Expression Matching

Alain Frisch, Luca Cardelli

A 2^{O(n^{1-\frac{1}{d}} \log n)} Time Algorithm for d-Dimensional Protein Folding in the HP-Model

Bin Fu, Wei Wang

Nash Equilibria in Discrete Routing Games with Convex Latency Functions

Martin Gairing, Thomas Lücking, Marios Mavronicolas, Burkhard Monien, Manuel Rode

Improved Results for Data Migration and Open Shop Scheduling

Rajiv Gandhi, Magnús M. Halldórsson, Guy Kortsarz, Hadas Shachnai

Deterministic M2M Multicast in Radio Networks

Leszek Gąsieniec, Evangelos Kranakis, Andrzej Pelc, Qin Xin

Regular Solutions of Language Inequalities and Well Quasi-orders ....... 870
Michal Kunc

A Calculus of Coroutines ........................................... 882
J. Laird

Almost Optimal Decentralized Routing in Long-Range Contact Networks .................................................. 894
Emmanuelle Lebhar, Nicolas Schabanel

Word Problems on Compressed Words ................................. 906
Markus Lohrey

Complexity of Pseudoknot Prediction in Simple Models .............. 919
Rune B. Lyngsø

Property Testing of Regular Tree Languages ........................................... 932
Frédéric Magniez, Michel de Rougemont

Entropy as a Fixed Point ............................................ 945
Keye Martin

Transparent Long Proofs: A First PCP Theorem for NP_R .............. 959
K. Meer

A Time Lower Bound for Satisfiability ................................... 971
Dieter van Melkebeek, Ran Raz

Some Results on Effective Randomness .................................. 983
Wolfgang Merkle, Nenad Mihailović, Theodore A. Slaman

A Polynomial Quantum Query Lower Bound for the Set Equality Problem .................................................. 996
Gatis Midrijānis

Succinct Representations of Functions ................................... 1006
J. Ian Munro, S. Srinivasa Rao

A Note on Karr’s Algorithm ............................................. 1016
Markus Müller-Olm, Helmut Seidl

The Existence and Efficient Construction of Large Independent Sets in General Random Intersection Graphs .............. 1029
S. Nikoletseas, C. Raptopoulos, P. Spirakis

Efficient Consistency Proofs for Generalized Queries on a Committed Database ........................................... 1041
Rafail Ostrovsky, Charles Rackoff, Adam Smith
A 2\frac{1}{2}-Approximation Algorithm for Rectangle Tiling ........................................ 1054
Katarzyna Paluch

Extensional Theories and Rewriting .............................................................. 1066
Grigore Roșu

Hardness of String Similarity Search and Other Indexing Problems .......... 1080
S. Cenk Sahinalp, Andrey Utis

A Syntactic Characterization of Distributive LTL Queries .................... 1099
Marko Samer, Helmut Veith

Online Scheduling with Bounded Migration ................................................. 1111
Peter Sanders, Naveen Sivadasan, Martin Skutella

On the Expressive Power of Monadic Least Fixed Point Logic ............... 1123
Nicole Schweikardt

Counting in Trees for Free ............................................................................. 1136
Helmut Seidl, Thomas Schwentick, Anca Muscholl,
Peter Habermehl

Games with Winning Conditions of High Borel Complexity ................. 1150
Olivier Serre

Propositional PSPACE Reasoning with Boolean Programs Versus
Quantified Boolean Formulas .......................................................................... 1163
Alan Skelley

LA, Permutations, and the Hajós Calculus ................................................. 1176
Michael Soltys

A Calibration of Ineffective Theorems of Analysis in a Hierarchy
of Semi-classical Logical Principles ............................................................ 1188
Michael Toftdal

Efficiently Computing Succinct Trade-Off Curves .................................... 1201
Sergei Vassilvitskii, Mihalis Yannakakis

On Randomization Versus Synchronization in Distributed Systems .... 1214
Hagen Völzer

A New Algorithm for Optimal Constraint Satisfaction
and Its Implications ......................................................................................... 1227
Ryan Williams

On the Power of Ambainis’s Lower Bounds ................................................. 1238
Shengyu Zhang

Author Index ..................................................................................................... 1251
Automata, Languages and Programming
