

TITLE SHOULD NOT EXCEED TWO TYPE-WRITTEN ROWS

In other case please give subtitle as well

Authors' name: First Author¹, Second Author² (Times new roman 12 pt, the spacing is before and after 6 pt, italic, please give the full name of all author)

¹Institute of First Author (Times new roman 10 pt, justified)

²Institute of Further Author

Tables

Tables, each bearing a title, should be self-explanatory and numbered consecutively. The same information should not be duplicated in tables and figures. The headline of the tables should be given in the same format as the axes titles.

Example: Temperature/K, Heat flow/mW or Heat capacity/J g⁻¹K⁻¹.

Temperature /K	Temperature /°C	Heating rate, v _h /°Cmin ⁻¹	Heat capacity /J g ⁻¹ K ⁻¹	E _a /Jmol ⁻¹	Density /gcm ⁻³
----------------	-----------------	--	---	------------------------------------	----------------------------

Outlook

- Dimensions

Please always use internationally accepted signs and symbols for units, SI units and give all dimensions according to the standard style of the Journal. Example: °C min⁻¹, g cm⁻³, or J g⁻¹ K⁻¹.

- Weight

Our Journal prefers the term of “mass” instead of “weight”, so please substitute weight by mass throughout the manuscript. (Example: sample mass, mass/% or mass loss etc.)

- Thermogram

Thermogram expression is rejected by the ICTAC. Instead of it, use the expression „curve”.

- Exo-Endo

The exotherm and/or endotherm directions should be marked in figures demonstrating calorimetric results.

- Variables

Please give all the variables appear in the text body in *italic* style according to the standards of our Journal. Let us call the attention of the authors to the fact that the letter ‘d’, which symbolize the differential in mathematic formulas is not a variable. Therefore it should appear in normal style. Example:

$$\text{Heat flow} = \frac{dQ}{dt}$$

- TGA

The Journal prefers the term TG instead of TGA, so please change it throughout the manuscript (except in the trademark names).

References

Citation

Reference citations in the text should be identified by numbers in square brackets. Some examples:

1. Negotiation research spans many disciplines [3].
2. This result was later contradicted by Becker and Seligman [5].
3. This effect has been widely studied [1-3, 7].

Reference list

The list of references should only include works that are cited in the text and that have been published or accepted for publication. Personal communications and unpublished works should only be mentioned in the text. Do not use footnotes or endnotes as a substitute for a reference list.

The entries in the list should be numbered consecutively.

Journal article

Smith JJ. The world of science. *Am J Sci.* 1999;36:234–5.

Article by DOI

Slifka MK, Whitton JL. Clinical implications of dysregulated cytokine production. *J Mol Med.* 2000; doi:10.1007/s001090000086

Book
