

Instructions to Contributors

The English edition of Chinese Journal of Integrative Medicine is edited and published by the Chinese Journal of Integrated Traditional and Western Medicine Press. Original scientific papers of advanced clinical and experimental medicine in the field of complementary/alternative medicine or integrative medicine are expected. Articles must not have been published in English elsewhere and are not under simultaneous consideration by other publications.

Manuscripts

The manuscripts should be prepared in accordance with the "Uniform Requirements for Manuscripts Submitted to Biomedical Journals: Writing and Editing for Biomedical Publication"(www.ICMJE.org). For randomized controlled trials, approval by ethics committee, signed informed consent from each subject and clinical trial registration number must be stated, and the manuscript should be prepared according to CONSORT 2010 and submitted with CONSORT 2010 checklist. The manuscripts should be written in English, each copy 3000–5000 words. The English manuscript should be typed double spacedly. For Chinese authors, please also submit Chinese version of the manuscript if available, as this could be useful to a Chinese reviewer.

Title Page

This page includes the title of the article which should be concise but informative; name of each author in English and Chinese (for Chinese author); name of department(s) and institution(s) to which the work was done; address, telephone and fax numbers, and E-mail address of author responsible for correspondence about the manuscript; and any grant support should be mentioned on this page.

Abstract and Key Words

The abstract (of no more than 300 words) should consist of four paragraphs, labeled Objective, Methods, Results, and Conclusions. They should state the purpose of the study or investigation, basic procedures, main findings (give specific data and their statistical significance), and the conclusions. Below the abstract provide 3–8 key words. Use terms from the medical subject headings (MeSH), and the traditional Chinese medical subject headings, present terms may be used.

Avoid abbreviations in the title, abstract and key words.

Text

Introduction State the purpose of the article. Give a brief, relevant background to the study.

Methods Describe the subjects (patients or laboratory animals, and the controls, including criteria for selection) clearly. For experimental investigations of human subjects, "Declaration of Helsinki: Ethical principles for medical research involving human subjects" (<http://www.wma.net/e/policy/pdf/17c.pdf>) should be followed. Describe the methods, apparatus and procedures in sufficient detail. Identify precisely all drugs and chemicals used, including generic name(s), dose(s) and route(s) of administration.

Results Present the results in the text, tables and illustrations concisely, do not repeat in the text all the data in the tables or illustrations; summarize only important observations.

Discussion Emphasize the new and important aspects of the study and the conclusions that follow from them. Include the implications of the findings and their limitations, as well as implications for future research. State new hypotheses when warranted, but clearly label them as such.

References

Number the references consecutively in the order

in which they are first mentioned in the text. The form of references should conform to the Index Medicus. List all authors when there are six or fewer; when there are seven or more, list the first six, followed by "et al." The following are sample references.

1. Sawin CT, Geller A, Wolf PA, Belanger AJ, Baker E, Bacharach P, et al. Low serum thyrotropin concentrations as a risk factor for atrial fibrillation in older persons. *N Engl J Med* 1994; 331:1249-1252.

2. Zhang HX, Shi ZX, Jia HZ, Li G, Cheng WL, Gu WL, et al. Effects of garlicin on NIH3T3 cell proliferation and collagen synthesis. *Chin J Integr Tradit West Med (Chin)** 2007;27:431-434.

3. Wellens HJJ, Brugada P, Bar F. Diagnosis and treatment of the regular tachycardia with a narrow QRS complex. In: Kibbertus HE, ed. *Medical management of cardiac arrhythmias*. Edinburgh, Scotland: Churchill Livingstone; 1986:121-132.

* means articles published in Chinese

Tables

Generally, the tables should be a three-line style. Type each of the tables with double space and with number and title. Data should be arranged clearly and concisely. Footnotes should be kept to a minimum. Columns must be provided with headings and units.

Illustrations

Photographs should be provided as high-resolution component files. When symbols, arrows, numbers, or letters are used to identify parts of the illustrations, explain each one clearly. Identify the original magnification and method of staining in photomicrographs.

Units of Measurement

Measurement of length, height, weight and volume should be reported in metric units (meter, kilogram, or liter) or their decimal multiples. All hematologic and clinical-chemical measurement should be reported in the metric system in terms of the International System of Units (SI).

Abbreviations and Terminology

Use only standard abbreviations. All abbreviations and acronyms are to be spelled out in full on their first appearance in the text. Herbs are to be presented by their common, pharmaceutical and pinyin or Latin names. Acupuncture terms are to be conformed to World Health Organization nomenclature.

Submission of Manuscripts

To speed up publication, authors should submit manuscripts through the ScholarOne Manuscript online system at <http://mc03.manuscriptcentral.com/cjim> or <http://www.cjim.cn/english/en/dpml.asp>. All manuscripts should be accompanied by a cover letter with the following information: significance of the paper to the readers of the Journal; a statement that the material is original and has not been submitted for publication elsewhere; written disclosure of any relationships or support which might be perceived as constituting a conflict of interest; a statement indicating that all authors have participated in the study and concur with the submission and subsequent revisions submitted by the corresponding author.

All contributions are subject to peer review, and the first round peer review is anticipated to be finished within one month. The publisher will provide the author(s) two copies of the journal free of charge. For any further enquiries, please do not hesitate to contact us by email: cjim_en@cjim.cn
